

The State of Zero Trust, SD-WAN and SASE Architectures

Remote work has driven the demand for increased security and networking solutions. Zero Trust, SD-WAN and SASE architectures hold the promise of:

Embedding security into the DNA of networking

Providing secure access to corporate services and applications to secure remote workers

Prioritizing business application traffic that dominates the branch WAN

Market awareness and adoption

Security and networking teams globally have implemented or plan to implement Zero Trust, SASE and SD-WAN at pace – are you ahead of the curve?

62%

are familiar with **Zero Trust**

45%

are familiar with **SASE**

38%

are familiar with **SD-WAN**

Over half of companies are already taking steps to deploy Zero Trust solutions:

Zero Trust

20% have deployed

37% plan to deploy

SASE

10% have deployed

39% plan to deploy

SD-WAN

11% have deployed

34% plan to deploy

Are you a high performing company?

High performing companies have a higher percentage of deployment of Zero Trust, SASE and SD-WAN technologies

48%

have deployed **Zero Trust**

33%

have deployed **SASE**

43%

have deployed **SD-WAN**

Who is making the security solution architecture decisions?

High performing

Network teams lead the decision-making at high-performing companies, but almost a third of companies report a collaborative approach between the Network and Security teams

Overall

Thinking of implementing a new security solution architecture?

When it comes to deploying both SD-WAN and cloud-delivered security for SASE architecture

71%

of respondents would select the best-in-breed vendors for SD-WAN and SASE deployment

Best-of-breed SD-WAN capabilities combined with best-of-breed cloud security vendors is a simple and effective way to incorporate cloud-based security services into the existing network and security infrastructure.

Read the full report to find out:

- The familiarity and deployment of the individual SD-WAN, SASE and Zero Trust solutions
- Regional differences in technology implementation and awareness across North America, Asia-Pacific, EMEA and LATAM
- Where you compare to the practices of organizations with highly effective network security and implementation
